CAMTEC BED SCALE INSTRUCTIONS

Scale Instructions:

Apply power to bed.
Press & release Freeze / Resume
Wait 5 seconds and CAMTEC will be replaced by "weight XXXX lbs."

Now Two Choices

Choice One - Patient Not in Bed

Step One - Place all inventory to be used by patient on the bed such as pillows, blankets, etc.
Step Two - Press 0.0 hold and follow instructions.
Step Three - Put patient in bed.
Step Four - Press WEIGHT MODE momentarily - read patient weight.

THE END

Choice Two - Patient in bed and patient weight known

Step One - Press FREEZE / RESUME and follow instructions on screen.
Step Two - When screen reads FREEZE change weight reading up or down by pressing and holding WEIGHT MODE (to increase) or WT / CHANGE MODE (to decrease) until correct patients weight appears on screen. If screen changes to "LEFT IN FREEZE / PRESS FREEZE" press and release FREEZE / RESUME. Then resume weight adjustment.
Step Three - Press FREEZE / RESUME and follow instructions.
Step Four - Press WEIGHT MODE momentarily - read patient weight.

THE END
